Objective

Software Developer with hands-on experience building secure, scalable RESTful APIs using Java, Spring Boot, and PostgreSQL, along with working knowledge of React.js and AI/LLM applications. Seeking to contribute to high-quality, maintainable software while growing as a backend and full-stack engineer.

Education

Jharkhand University of Technology

Sep. 2021 – July 2025

Bachelor of Technology in Computer Science and Engineering (7.2 CGPA)

Ranchi, Jharkhand

Relevant Coursework

- DSA
- Software Methodology
- Artificial Intelligence
- Systems Programming
- Computer Networks
- Database Management
- OOPS
- Operating System

Experience

ToTheByte Technology Private Limited

March 2026 – Present

Software Developer

- Develop and maintain **scalable backend applications** using Java, Spring Boot, PostgreSQL, and RESTful APIs, following clean and maintainable software development practices.
- Implement **secure authentication, authorization, exception handling, and API integrations**, while using Postman for API testing, debugging, and validation.

Siemens

March 2025 – April 2025

Trainee

Center of Excellence, Dhanbad

- Completed **Siemens-certified SCADA and PLC training**, gaining hands-on exposure to industrial automation and control systems.
- Developed a **Smart Parking System** to improve parking security, space management, and operational efficiency.

TechSaksham

Jan 2025 – Feb 2025

Software Engineer Intern

- Completed the **AI Transformative Learning Internship** under AICTE's TechSaksham initiative by Microsoft & SAP, gaining industry-oriented AI development experience.
- Built **AI-powered chatbot and healthcare web prototypes**, applying AI concepts to real-world automation and solution development.

Projects

Multilingual AI Chatbot | *Python, LLMs, LangChain, Hugging Face, NLP, RAG, Vector Database, Streamlit*

2026

- Developed a **multilingual conversational AI chatbot** capable of understanding and responding to user queries across multiple languages using LLMs and NLP techniques.
- Implemented a **RAG (Retrieval-Augmented Generation) pipeline** with LangChain and vector embeddings to retrieve relevant information and generate context-aware responses.

Book Catalog Management Service | *Java, Spring Boot, JPA, REST API, PostgreSQL, Postman*

2026

- Developed a **secure RESTful backend** using Java and Spring Boot with CRUD operations and exception handling.
- Implemented **Controller–Service–Repository architecture** with JPA and PostgreSQL for data management.
- Secured and tested APIs using **Spring Security and Postman**, and deployed the application for reliable API access.

Technical Skills

Languages: Java, Python, C/C++, JavaScript, SQL

Databases: PostgreSQL, MySQL, MongoDB

Operating Systems: Linux, Unix, Windows

AI/LLM: Spring AI, LLM, OpenAI-API, AI Integration

Developer Tools: Git, GitHub, Eclipse, VS Code, Maven, Postman

Technologies/Frameworks: Spring Framework, Spring Security, JWT, ReactJS, RESTful API, API Integration, AWS, Cloud Computing, Docker, SDLC, Vercel, Render

Certifications

- Java Certification from Infosys Springboard
- Python Language Certification from Google
- SQL Command from IBM Developer Skills Network
- GitHub Professional Certification from GitHub
- Soft Skills Development Certification from TCS
- Machine Learning Certification from IBM
